

# Beard hype, or not?

Enigma n°10

25<sup>th</sup> June 2024

At the beginning of September 2023, there were 50 times more bearded than beardless students at CentraleSupélec. But over the course of the year, 60 bearded students started shaving. In addition, among the students who used to shave, 5 left CS to pursue a university degree, and 10 ultimately opted for the bearded hipster look. At the end of the year, there were only 30 times more bearded people than hairless people.

How many students were there at the beginning of September?
